How it works

License Dashboard Academy provides short, computer-based training modules that focus on achieving a specific set of learning objectives. Delivered as a combination of online videos and exam-based training, it is based on realistic scenarios and is developed by consultants who use the tools daily.

At the end of each module, users complete a short assessment to identify their accomplishments or training needs. Once each License Dashboard module is completed, you will gain an industry recognized qualification: Certified License Manager.

License Dashboard Academy guides users through all License Manager workspaces:
