-  Guaranteed return on investment (ROI)
-  Builds your SAM capabilities for the future

Product. Service. Training

License Dashboard SAM Essentials empowers cost savings and compliance risk reduction with an effective SAM program that gives your team the skills to manage your organization's software licenses effectively.

By combining your SAM tool investment with service and support provided by License Dashboard SAM specialists, your organization gets the essentials of a SAM program while building for the future with structured SAM training.

Product: License Manager

License Manager is a powerful, easy-to-use platform that allows organizations to accurately manage software licenses. The tool provides advanced licensing automation, speeding up day-to-day tasks for software asset managers and ensuring that complicated license metrics are calculated correctly. License Manager guarantees that your organization is receiving the maximum ROI on its software purchases, saving you up to 30% of your software spend.

Service: select the software you want to manage

Our SAM consultants get your organization's SAM program up and running quickly – in days, not months. Select either three, five, or ten key vendors to be managed by our specialists. The proof of entitlement and software inventory for your selected vendors is validated and uploaded on your behalf, with continued quarterly health checks to authenticate your compliance status.

Your organization's own SAM manager has full access to License Manager and can continue to manage all vendors deployed across your software estate.

Training: develop your own SAM skills

The extensive training and support we provide as a part of SAM Essentials allows you to select a team member to be the owner of your SAM program, regardless of SAM experience.

We provide a structured three-year development plan, assessed quarterly by your dedicated License Dashboard SAM consultant. Your SAM owner also receives access to both the online License Dashboard Training Academy and online licensing training provided by The ITAM Review, both awarding industry recognized qualifications.

Three levels to suit your needs

License Dashboard SAM Essentials is designed to suit the requirements of your organization with full access to manage your entire software estate. Our specialists ensure that a selection of your key vendors are quickly onboarded and ready to manage. These selected vendors will continue to receive quarterly health checks to ensure your organization is receiving the greatest value from your SAM investment.

Level One	Level Two	Level Three
License Manager subscription - three years	License Manager subscription - three years	License Manager subscription - three years
On-premise SAM tool deployment	On-premise SAM tool deployment	On-premise SAM tool deployment
Three vendors managed	Five vendors managed	Ten vendors managed
Installation and silver support	Installation and silver support	Installation and silver support
Quarterly health check	Quarterly health check	Quarterly health check
Industry recognized qualifications and ongoing mentorship	Industry recognized qualifications and ongoing mentorship	Industry recognized qualifications and ongoing mentorship

Personal development plan

Your nominated SAM owner will be enrolled onto the License Dashboard SAM Essentials personal development plan. This includes access to the online License Dashboard Academy – which provides video-based SAM tool training – and The ITAM Review’s LISA licensing training school.

The three-year development program is aligned to official IT Asset Management ISO Standards, resulting in your organization skilling up to full SAM professional standards. Assessed on a quarterly basis by our SAM consultants, your organization’s SAM owner is awarded industry recognized qualifications, including certifications from License Dashboard as:

- SAM Analyst: year one
- SAM Specialist: year two
- SAM Practitioner: year three

SAM Essentials ensures that your organization gets the most value from the vast opportunities provided by an effective SAM program, rather than relying on third-party support.

Additional service options for additional vendors

Onboard additional vendors in line with your organization’s changing requirements.

Discovery tool

License Dashboard’s discovery solutions, Dashboard Discovery and License Dashboard ScanWin provide agent-based or agentless scanning for your organization.

Audit support services

Our team of consultants provide audit defence or support services to ensure risk of non-compliance is further minimized.

Software optimization service

Ensure your Microsoft spend and future licensing plan is fully optimized with a full review of your current license estate and business requirements.
